

## Design Email Campaign Schema

Design a system to be used by various companies to reach out to their connections through automated email campaigns.

### **System requirements:**

1. Companies should be able to add/update connections.
2. Companies should be able to create email campaigns.
3. Each campaign can have multiple email templates to be delivered after a specified duration of time if the connection does not reply to the mail.
4. Companies should be able to stop the campaign for all or some of the connections.
5. Email templates should be reusable (i.e. same template can be a part of different campaigns).

### **Future Scope:**

1. Group connections based on any criteria (Ex: Backend Profile, Frontend Profile, ICPC Qualifier).
2. Group campaigns and templates based on any criteria.

## Email Campaign Schema

### Main Tables:

#### 1. Companies

- Company\_id (PK) - INT, AUTO\_INCREMENT
- Name - VARCHAR(255), NOT NULL
- Email - VARCHAR(255), NOT NULL, UNIQUE

#### 2. Connections

- Connection\_id (PK) - INT, AUTO\_INCREMENT
- Company\_id (FK) - INT, NOT NULL
- Name - VARCHAR(255), NOT NULL
- Email - VARCHAR(255), NOT NULL, UNIQUE

#### 3. Email\_Templates

- Template\_id (PK) - INT, AUTO\_INCREMENT
- Template\_name - VARCHAR(255), NOT NULL
- Subject - VARCHAR(255), NOT NULL
- Body - TEXT, NOT NULL

#### 4. Campaigns

- Campaign\_id (PK) - INT, AUTO\_INCREMENT
- Campaign\_name - VARCHAR(255), NOT NULL
- Start\_date - DATE, NOT NULL
- End\_date - DATE

## **Lookup Tables:**

### **5. Campaign\_Templates**

- Campaign\_template\_id (PK) - INT, AUTO\_INCREMENT
- Campaign\_id (FK) - INT, NOT NULL
- Template\_id (FK) - INT, NOT NULL
- Delivery\_duration - INT, NOT NULL

### **6. Campaign\_Connections**

- Campaign\_connection\_id (PK) - INT, AUTO\_INCREMENT
- Campaign\_id (FK) - INT, NOT NULL
- Connection\_id (FK) - INT, NOT NULL
- Status - ENUM('Active', 'Stopped', 'Completed'), NOT NULL

### **7. Company\_Campaigns**

- Company\_campaign\_id (PK) - INT, AUTO\_INCREMENT
- Company\_id (FK) - INT, NOT NULL
- Campaign\_id (FK) - INT, NOT NULL

## **Future Scope Tables:**

### **8. Groups**

- Group\_id (PK) - INT, AUTO\_INCREMENT
- Group\_name - VARCHAR(255), NOT NULL, UNIQUE

### **9. Connection\_Groups**

- Connection\_group\_id (PK) - INT, AUTO\_INCREMENT
- Connection\_id (FK) - INT, NOT NULL
- Group\_id (FK) - INT, NOT NULL

### **10. Campaign\_Groups**

- Campaign\_group\_id (PK) - INT, AUTO\_INCREMENT
- Campaign\_id (FK) - INT, NOT NULL
- Group\_id (FK) - INT, NOT NULL

### **11. Template\_Groups**

- Template\_group\_id (PK) - INT, AUTO\_INCREMENT
- Template\_id (FK) - INT, NOT NULL
- Group\_id (FK) - INT, NOT NULL

## Cardinality and Relationships:

### 1. Companies to Connections: One-to-Many (1:m)

- Each company can have multiple connections.
- **Managed By:** Connections table with Company\_id FK

### 2. Companies to Campaigns: Many-to-Many (m:m)

- Each company can create multiple campaigns
- Each campaign can be associated with multiple companies.
- **Managed By:** Company\_Campaigns table.

### 3. Campaigns to Email\_Templates: Many-to-Many (m:m)

- Each campaign can use multiple email templates
- Each email template can be used in multiple campaigns.
- **Managed By:** Campaign\_Templates table.

### 4. Campaigns to Connections: Many-to-Many (m:m)

- Each campaign can target multiple connections
- Each connection can be part of multiple campaigns.
- **Managed By:** Campaign\_Connections table.

### 5. Connections to Groups: Many-to-Many (m:m)

- Each connection can belong to multiple groups
- Each group can contain multiple connections.
- **Managed By:** Connection\_Groups table.

### 6. Campaigns to Groups: Many-to-Many (m:m)

- Each campaign can belong to multiple groups
- Each group can contain multiple campaigns.
- **Managed By:** Campaign\_Groups table.

### 7. Templates to Groups: Many-to-Many (m:m)

- Each template can belong to multiple groups
- Each group can contain multiple templates.
- **Managed By:** Template\_Groups table.

### Primary Keys:

1. **Companies:** Company\_id
2. **Connections:** Connection\_id
3. **Email\_Templates:** Template\_id
4. **Campaigns:** Campaign\_id
5. **Campaign\_Templates:** Campaign\_template\_id
6. **Campaign\_Connections:** Campaign\_connection\_id
7. **Company\_Campaigns:** Company\_campaign\_id
8. **Groups:** Group\_id
9. **Connection\_Groups:** Connection\_group\_id
10. **Campaign\_Groups:** Campaign\_group\_id
11. **Template\_Groups:** Template\_group\_id

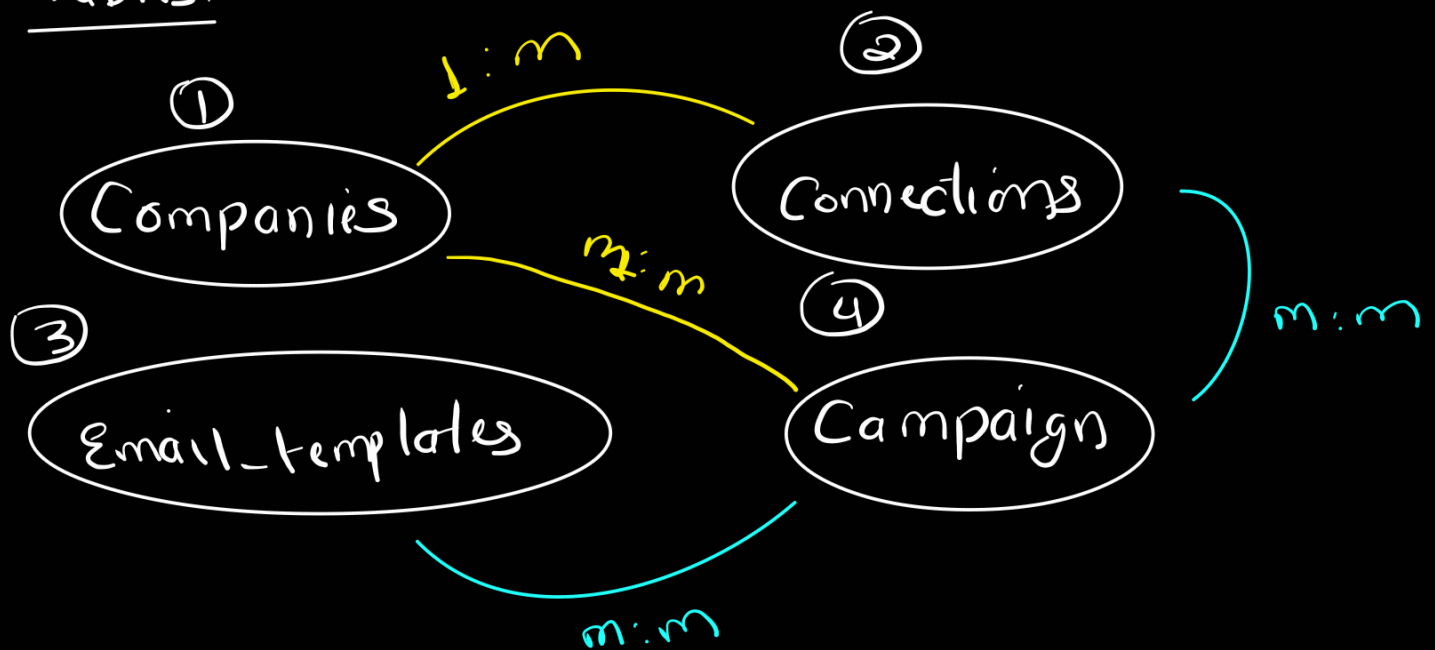

### Foreign Keys:

1. Company\_id REFERENCES Companies(Company\_id) ON DELETE CASCADE
2. Campaign\_id REFERENCES Campaigns(Campaign\_id) ON DELETE CASCADE
3. Template\_id REFERENCES Email\_Templates(Template\_id) ON DELETE CASCADE
4. Campaign\_id REFERENCES Campaigns(Campaign\_id) ON DELETE CASCADE
5. Connection\_id REFERENCES Connections(Connection\_id) ON DELETE CASCADE
6. Company\_id REFERENCES Companies(Company\_id) ON DELETE CASCADE
7. Campaign\_id REFERENCES Campaigns(Campaign\_id) ON DELETE CASCADE
8. Connection\_id REFERENCES Connections(Connection\_id) ON DELETE CASCADE
9. Group\_id REFERENCES Groups(Group\_id) ON DELETE CASCADE
10. Campaign\_id REFERENCES Campaigns(Campaign\_id) ON DELETE CASCADE
11. Group\_id REFERENCES Groups(Group\_id) ON DELETE CASCADE
12. Template\_id REFERENCES Email\_Templates(Template\_id) ON DELETE CASCADE
13. Group\_id REFERENCES Groups(Group\_id) ON DELETE CASCADE

## Indexes:

1. **Companies :-** Index on Email (UNIQUE)
2. **Connections :-** Index on Email (UNIQUE) , on Company\_id (FK)
3. **Email\_Templates :-** Index on Template\_name
4. **Campaigns :-** Index on Campaign\_name
5. **Campaign\_Templates :-** Index on Campaign\_id (FK) , on Template\_id (FK)
6. **Campaign\_Connections :-** Index on Campaign\_id (FK) , on Connection\_id (FK)
7. **Company\_Campaigns :-** Index on Company\_id (FK) , on Campaign\_id (FK)
8. **Connection\_Groups :-** Index on Connection\_id (FK) , on Group\_id (FK)
9. **Campaign\_Groups :-** Index on Campaign\_id (FK) , on Group\_id (FK)
10. **Template\_Groups :-** Index on Template\_id (FK) , on Group\_id (FK)
